\* Recommendation in line with Key Opinion Guidelines (WSAVA) & widely used in practice.<sup>1</sup>

† When using Nobivac® Respira Bb DHPPi or Pi are recommended to be given concurrently.

^ A single vaccination, administered 7 months after primary vaccination with Nobivac® Respira Bb, is sufficient to maintain protection against Bb for a further year. Thereafter, a single vaccination should be administered, annually. In case re-vaccination at 7 months is missed, a single vaccination within 12 months after primary vaccination is sufficient to extend protection against Bb for a further year.
